DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 17-37, 47-70, 109, 110, and 112-130, drawn to a semiconductor device, class 257, subclass 595.
 - II. Claims 38-46, 71-108, and 111, drawn to a method of using a semiconductor device, class 361, subclass 281.
2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, for example, instead of adjusting the plate area to control the minimum and maximum capacitances of the varactor, the varactor of claim 17 can be used in a circuitry which requires a capacitor with a single capacitance value at a time, which can be derived by applying a desired voltage to the gate of the capacitor.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
